WHY CHOOSE US?

Trysens App comes with a set of features that you will definetly be interested in as a Manufacturer, or Equipment owner. It's likely that you are interested in knowing the state and/or values of a certain equipment/sensor without really going physically there.

- Read and analyze equipment variables using your mobile, anywehere and any time. You can also see real-time charts about your data.

- The app displays the values in the form of industrial measuring devices. Such variables are in two types: Analog (4 - 20mA, 0 - 5V) or Digital (On/Off).

- Receive notifications whenever an analog variable reaches its lowest or highest value, or when a digital variable switches between On/Off.

FREE DOWNLOAD FOR YOUR MOBILE

OUR MOBILE APP

Trysens Mobile App is an efficient monitoring system, it allows you to see data sent by your equipment in a modern and simple layout. Trysens is available on Android, iOS, and Web.
